

Question 1 Solution :-

```
with total_money_spent as (  
  select poll_option_id,  
  sum(amount) as totalspent  
  from probo2  
  group by poll_option_id  
) ,  
winning_amnt as (  
  select user_id, amount,  
  amount / (select sum(amount) from probo2 where poll_option_id = 'C') as proportion  
  from probo2  
  where poll_option_id = 'C'  
) ,  
losing_amnt as(  
  select  
  sum(amount) as losing_amount  
  from probo2  
  where poll_option_id in ('A', 'B', 'D')  
) ,  
proportion_distribution as (  
  select  
  w.user_id,  
  w.amount as initial_amnt,  
  w.proportion,  
  w.amount + (l.losing_amount * w.proportion) as return_r  
  from winning_amnt w cross join losing_amnt l  
) select user_id, round(return_r, 0)  
  from proportion_distribution  
  order by user_id;
```
